- 2009**
 - Winner of the IT Innovation Award in the category "Storage / Networks" (LANCOM OAP-310agn Wireless)
 - Channel Champions 2009: Winner in the category "telecommunications", second in the category "Networks"
 - Finalist at Wireless Broadband Innovation Award 2009 in the category "Best Wireless Broadband Security Innovation" (LANCOM 1751 UMTS)
 - New platform: Enterprise Central Site Gateway LANCOM 9100 VPN for up to 1.000 tunnels; WLAN Controller LANCOM WLC-4100 for up to 1.000 access points
 - Portfolio complemented by offering Gigabit Network Switches
- 2008**
 - Awarded by the Initiative Mittelstand (SME Initiative) with the Innovation Prize 2008 in the category "Storage/Networks" (LANCOM 1751 UMTS)
 - Reference award from Network Computing for best upgrade policy
 - 300 Mbps wireless LAN range of 802.11n products
 - World's First 802.11n Outdoor Access Point (LANCOM OAP-310agn)
 - Worldwide first business VPN router with UMTS/ADSL2+ and integrated GPS anti-theft protection: LANCOM 1751 UMTS
- 2007**
 - LANCOM WLC-4025 and WLC-4006 WLAN controllers for easy and secure WLAN management
 - Integration of PBXs in all LANCOM routers
- 2006**
 - First business VoIP gateway with integrated ADSL2+ modem and VPN
 - LANCOM VoIP Call Manager: Current LANCOM routers can be upgraded thanks to software options
- 2005**
 - LANCOM WLAN management for central administration of medium and large WLAN installations
 - WLAN products with special protective housing constructed for tough outdoor and industrial environments
 - Expansion of portfolio to include the core business Voice over IP (VoIP)

- 2004**
 - First European manufacturer with enhanced WLAN security (IEEE 802.11i, LEPS)
 - Integration of Voice over IP functions in all LANCOM products
- 2003**
 - First WLAN products with up to 108 Mbps data transfer speed certified throughout Europe
 - First simultaneous dualband 54 Mbps WLAN access point for standards IEEE 802.11a, g, b
- 2002**
 - LANCOM Systems GmbH becomes an independent company and wins T-Com as OEM customer
 - First European 54 Mbps WLAN products in IEEE 802.11a standard that are RegTP-certified
 - First WLAN access points worldwide with integrated VPN technology (IPSec over WLAN)
 - Integration of firewall functions in all LANCOM products
- 2001**
 - First WLAN access point with integrated accounting software for HotSpot operations
- 2000**
 - First 11 Mbps WLAN access point worldwide with integrated router and ISDN interface
 - LANCOM Dynamic VPN technology allows connections with dynamic IP addresses for the first time
- 1999**
 - VPN/IPSec encryption technology for the LANCOM product series
 - First combined ISDN/DSL router
- 1998**
 - First 2 Mbps WLAN access point worldwide with integrated router and ISDN interface
 - Firmsafe security concept (for LCOS uploads)
- 1997**
 - LANCOM office products: First ISDN router with toll protection and budget control and integrated PBX; LANcapi – ISDN CAPI interface
 - LANtools set the standard in intuitive user interfaces
- 1995**
 - “Communications Systems” business division founded at ELSA GmbH
 - First multi-protocol router with integrated ISDN interface
