LANCOM Public Spot Option

The versatile hotspot solution

- User-friendly user authentication via the web interface
- Easy printing of vouchers for charged Internet access
- Optional storage of connection data
- Strict separation of guest access from the company network by means of VLAN technology
- Interface to external billing programs (RADIUS server)
- Can be activated for all LANCOM WLAN routers, access points and WLAN controllers and central-site gateways

Constant information and the ability to receive important e-mails anywhere: These are the priorities in this modern age of information and communications. This is why many hotels, cafés, hospitals, public authorities and companies are offering their customers paid or unpaid access to the Internet via what are known as hotspots. Be it via wireline or wireless LAN: The LANCOM Public Spot Option allows you to set up secure Internet access accounts – quickly and easily.
