

LANCOM WLAN Survey Service

Optimal planning of Wi-Fi infrastructures

Inadequately planned networks lead to complaints from unhappy users, wasted time, and unnecessary costs. Take the opportunity to use professional network planning to implement your Wi-Fi to best effect. Make sure that your building has optimal coverage so that your Wi-Fi infrastructure is implemented efficiently. The result provides completely transparent information on how many devices you need for your implementation.

- › Virtual Wi-Fi coverage across the premises based on floor-plan drawings
- › Documentation presenting detailed planning results
- › Estimation of the costs for implementing the WLAN project
- › Available as a LANCOM WLAN Survey Service Voucher
- › A LANCOM WLAN Survey Service Voucher corresponds to a processing time of half a working day (4 hours)

LANCOM WLAN Survey Service

Professional planning

Rely on LANCOM expert know-how and plan your WLAN infrastructure before the installation.

Optimal coverage

Our experts plan your WLAN installation professionally and reliably so you know exactly how many LANCOM devices you need for optimal coverage.

Services

A LANCOM WLAN Survey Service Voucher entitles you to the following services:

- › Virtual coverage (off-site) of the premises based on the available floor plans and relevant construction information
- › Documentation presenting detailed planning results

One voucher corresponds to a processing time of half a working day (4 hours).
