

OPTIMIZING HOSPITAL PROCESSES

OUR SOLUTION

- › Full Wi-Fi coverage for the wards, and centralized management of access points by WLAN controller (WLC)
- › Optimal network utilization through simultaneous operation of the 2.4-GHz network (patient hotspot) and 5-GHz network (mobile services)
- › Logical separation of the different applications by SSIDs and VLANs

CUSTOMER BENEFITS

- › The solution's high scalability enables gradual expansion to new wards and all the DIAKOVERE hospitals
- › Failover reliability: Stand-alone operation of access points in case of WLC failure
- › More time and effective patient care due to electronic health records on mobile ward rounds

SECURE. NETWORKS.

DIAKOVERE GmbH – Friederikenstift Hannover

Industry: Healthcare

Area served by Wi-Fi: All wards

Project: Electronic health record and Wi-Fi hotspot with wireless infrastructure for optimized processes
