

CLINIC WI-FI FOR DOCTORS & PATIENTS

THE ALICE HOSPITAL HAS A MODERN WIRELESS NETWORK FOR MEDICAL APPLICATIONS AND PATIENT HOTSPOTS

- › 120 access points with an approval for medical environments cover 19,000 square meters simultaneously in the 2.4- and 5-GHz bands
- › Logically separated networks for patient hotspots and medical services
- › Central WLAN controller manages and configures the access points

CUSTOMER BENEFITS

- › Access to electronic health records via laptop: future integration of further Wi-Fi devices possible
- › High availability access points (managed by WLC, and standalone if the WLC fails) as well as optimal utilization of the network
- › Patient hotspot increases satisfaction
