Hardware Quick Reference LANCOM GS-3126X

1 Configuration interface (Console)

(2) TP Ethernet interfaces 10M / 100M / 1G

or a LAN switch.

Connect the configuration interface via the included serial configuration cable to the serial interface of the device you want to use for configuring / monitoring the switch.

Use Ethernet cables to connect the interfaces 1 to 24 to your PC

ATTENTION: High touch current possible! Connect to earth 5) before connecting the power supply.

Before initial startup, please make sure to take notice of the information regarding the intended use in the enclosed installation guide!

Operate the device only with a professionally installed power supply at a nearby power socket that is freely accessible at all times.

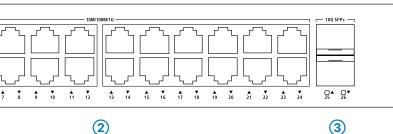

The power plug of the device must be freely accessible.

Please note that support for third-party accessories (SFP and DAC) is not provided.

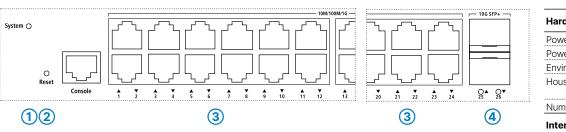

Insert suitable LANCOM SFP modules into the SFP+ interfaces 25 to 26. Choose cables which are compatible with the SFP modules and connect them as described in the module's documentation.

A Power connector (device back side)

Supply power to the device via the power connector. Please use the IEC power cable supplied or a country-specific LANCOM Power Cord.
