

LANCOM SPSU-250

Hot-swappable power supply unit for selected LANCOM access and aggregation switches

This power supply unit is the ideal solution for maximum reliability when using the aggregation switch models LANCOM XS-5116QF or LANCOM XS-6128QF as well as the access switch models LANCOM GS-4554X or LANCOM GS-4530X in business-critical network environments. It offers the possibility of changing the power supply unit during operation, thus providing a highly available, redundant power supply for the switches.

- → 250 Watt power supply unit
- → Improved failover of the LANCOM XS-5116QF, LANCOM XS-6128QF, LANCOM GS-4554X, or LANCOM GS-4530X
- \rightarrow Hot-swappable can be inserted during operation
- $\rightarrow\,$ Input voltage: 110 VAC and 230 VAC
- → Output voltage: 12 V @20 A
- → Over current protection
- → Over voltage protection
- → Over temperature protection
- → Operating temperature: 0°C to 50°C
- \rightarrow Not suitable for operation in ambient temperatures below -40°C and above 70°C
