Release Notes

LTA Client macOS
1.01 Rel

Table of contents

1. Preface

The LANCOM LTA Client macOS provides mobile employees with encrypted access to the company network, whether they are at their home office, on the road, or even abroad.

This document describes the innovations within the LANCOM LTA Client macOS software release 1.01 Rel, as well as the improvements since the previous versions.

A valid LTA license in the associated LANCOM Management Cloud project is required to use the LTA Client macOS.

Mac and macOS are trademarks of Apple Inc. registered in the U.S. and other countries.

2. The release tag in the software name

Release Candidate (RC)
A Release Candidate has been extensively tested by LANCOM and includes new LCOS featurses. It is suitable for testing and is not recommended for use in productive environments.

Release Version (REL)
The release version has been extensively and successfully tested in practice. It contains new features and improvements over previous LANCOM operating system versions and is therefore recommended for use in productive environments.

Release Update (RU)
A release update is a further development of an initial release version in productive environments and contains minor improvements, security fixes, bug fixes and smaller features.

Security Update (SU)
Contains important security fixes for the respective LANCOM operating system version and ensures that your security level remains very high on an ongoing basis in your productive environment.
