

# LANCOM VoIP+10-Option

## Upgrade of LANCOM VoIP routers for 10 additional VoIP call numbers

The LANCOM VoIP +10 Option enables the registration of 10 additional VoIP call numbers to a LANCOM VoIP router. Thanks to an additive license model the assignment of up to 40 internal and 55 external VoIP call numbers is possible - ideal for a flexible extension of the telecommunications infrastructure and a step-by-step adjustment from ISDN / analog to VoIP telephony.

- Option for the use of 10 additional internal VoIP call numbers with a LANCOM router
- Additive license model for the extension of up to 40 internal and 55 external VoIP call numbers for one device

# LANCOM VoIP+10-Option
