

# LANCOM HA Clustering XL Option

Central management and convenient configuration alignment of  
several WLAN controller or central site VPN gateways

- Comfortable administration of cluster devices like one single device - even at networks across locations
- Allows the grouping of up to 10 WLAN controllers and central site VPN gateways to one device cluster
- Available as LANCOM WLC Clustering XL Option for the LANCOM WLC-1000, LANCOM WLC-4100 and the LANCOM WLC-4025+ and as LANCOM VPN Clustering XL Option for the Central Site VPN Gateways LANCOM ISG-1000, LANCOM ISG-4000, LANCOM ISG-8000, LANCOM 7100+ VPN and LANCOM 9100+ VPN

# LANCOM HA Clustering XL Option

## Scope of functionality

|   |  |
|---|--|
| Automatic configuration alignment (Config Sync) | Due to the grouping of several individual devices to one device group (cluster), configuration changes conducted for one device can be automatically synchronized with all cluster devices, without having to manage each device manually (Config Sync). |
|---|--|
