

A SURE FOOTING IN THE CLOUD

OUR SOLUTION

- Central management of the entire network infrastructure (routers, switches and access points) via the LANCOM Management Cloud (LMC)
- POS systems, EC cash clearing, people counters, tablet communication, and order processing, all centrally connected via VoIP routers
- The ideal basis for the integrated omnichannel concept

CUSTOMER BENEFITS

- Process optimization and major time saved thanks to infrastructure monitoring by LMC
- Ease of use and a consistent configuration of devices allows customized expansion of the network
- Firmware updates for all locations within minutes at the click of a mouse

HR Reno GmbH

Industry: Retail

Locations: 300 stores

Project: Future-proof and high-performance store networks with software-defined networking from the cloud
