Wireless LAN in Hotels

© Austria Trend Hotels & Resorts

Customer

The **Verkehrsbüro Group** has been Austria's leading tourism enterprise for over 90 years. With business sectors in the hotel industry, leisure tourism, and business tourism, the Group has a wide range of touristic offerings based on the needs of the customer – from private visitors to corporate customers and public institutions.

Located directly next to the Museum of Technology, the Hotel Park Royal Palace Vienna has set new standards in the area since October 4, 2011. This state-of-the-art building surprises not only with technical innovations, but also with unique architectural features.

Idea / Requirements

- **Unobtrusive installation** of network components
- **Mobile Internet access** for visitors and guests
- **Lowest possible management and administrative overhead**

Solution

- **Implementation of controller-based wireless LANs** over approximately 30,000 m²
- **Unobtrusive installation** of the access points in suspended ceilings and behind wall claddings
- Provision of a **guest WLAN with the Public Spot Option**

Benefits

- **Added value for guests and visitors** from mobile Internet access
- **Customized Public Spot login page** in the hotel's corporate design
- **Discreet installation of the hardware** in keeping with the hotel's design
- **Optimized operations through centralized configuration and management** via WLAN controller
- **Complete coverage thanks to automatic WLAN optimization** (by WLAN controller)

Infrastructure

1 x LANCOM WLAN controller with Public Spot Option

LANCOM indoor access points
