

## Customer

The **accepta Holding GmbH** is a modern service provider in nursing and healthcare. The company is involved in traditional nursing and also in areas of specialized care. The care providers operate a number of institutions that offer palliative care, nursing for the critically ill, as well as the nursing and care of chronically mentally ill adults. accepta maintains a total of four homes and also an Academy.

## Concept / Requirements

- **Secure access to central terminal server** from all sites
- **Wi-Fi infrastructure** for employees, residents and guests, as well as integration of Wi-Fi-enabled displays for nursing documentation
- **Wi-Fi and site connectivity from a single manufacturer**

## Solution

- **VPN routers for secure connectivity** between four sites and the main office
- **Installation of a wireless point-to-point link** for connectivity at one site
- **Implementation of wireless networking** in the building (at two sites by controller)
- **Support of Wi-Fi for employees, residents and guests** with different SSIDs and divided into logically separate subnets
- **Integration of mobile displays** in the wireless network

## Benefits

- **Quick and efficient cost reporting**, all data is passed to the main office via secure VPN channels
- Access via VPN connection enables **fast and flexible personnel planning**, as employees have secure access to the central server from anywhere
- **Full and fast documentation of nursing activities** via Wi-Fi-enabled displays
- **Increased mobility** for residents, visitors, and employees thanks to the wireless network

## Infrastructure
