# Digital, sovereign IT networks for Europe

A leading European manufacturer. Secure network solutions. Engineered in Europe.
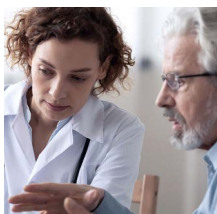

Together, we are facing a major task – to ensure the future viability of **public administration and schools** through digitalization.

We offer smart, secure and scalable solutions for the deployment, implementation and management of IT networks for **multi-branch businesses**.

SMEs face unique challenges in meeting demanding expectations – and it is precisely for these tasks that we guarantee a high level of empathy.

A secure, legally compliant IT infrastructure is central to digitalization in the **healthcare** sector. We support healthcare providers with data protection and care.

Why collaboration makes sense

As an agile, medium-sized company, mutual respect is the foundation of our collaboration.

A high level of trustworthiness

→ Backdoor freedom is an essential protective feature of the products. The trustmark "IT-Security Made in Germany" and certification by the Federal Office for Information Security (BSI) confirm the trustworthiness and outstanding security level.

A solid business foundation

→ As a 100% subsidiary of the German technology group Rohde & Schwarz GmbH & Co. KG, based in Munich, we operate with a long-term and independent perspective.

Certified information security

→ The ISO/IEC 27001 certification for the LANCOM Management Cloud and the service and support processes confirms the highest standards in information security and the protection of sensitive data.

We develop secure and reliable solutions from software, hardware and (cloud-based) services for digital (business) transformation. We standardize, automate and digitalize the network infrastructure across all business areas and in public administration.

Digital sovereignty

„ ... every day, we look beyond the horizon to advance Europe's technological expertise."

Lutz Linzenmeier, Sales Engineering International, LANCOM Systems

GDPR ✓ NIS2 ✓ DORA ✓ NO BACKDOORS ✓

As a leading European manufacturer of IT network technology, we offer reliable and secure IT infrastructures „Engineered in Europe" for business and administration.

Technological innovation, a high level of user proximity and energized people are the enablers in bringing our ideas to life. We are advancing **digital sovereignty** in a crucial technological environment.

LANCOM SYSTEMS

LANCOM Systems

LANCOM Management Cloud

Say goodbye to highly complex and difficult-to-manage networks: the LANCOM Management Cloud (LMC) is a fully integrated management system that intelligently organizes, optimizes, and controls your entire network architecture in WAN, LAN, WLAN, and security. Complex network configurations that were previously reserved for certified IT experts and associated with a high level of manual effort are reduced to just a few minutes and clicks.

LANCOM product portfolio. Comprehensive. Digitally sovereign. Highly secure.

Routers & SD-WAN
Professional internet access for small, medium-sized and large businesses, branch offices and home offices. Secure networking of locations.

Remote & mobile access
Secure access to company applications in the office, at home or on the move through VPN and zero-trust principle.

Security
Comprehensive protection of company and user data against unauthorized access and cyber attacks.

Switches
CLI-compatible access, aggregation and core switches, for scalable switch architectures and campus networking.

Wireless LAN
Tailored solutions, indoor, outdoor, in demanding environments, available at all times, secure and stable.

Specialist expertise

As specialists, we know the requirements of our clients and the system integrator partners who support them.

Site Networking
→ IT networks for businesses and branch-structures, indoor & outdoor
→ Three-tier switch networks from access to core, CLI-compatible
→ Maximum bandwidth (router, firewall)
→ The highest security requirements
→ Software-defined: SD-WAN, SD-branch

Network security
→ Protection of your own IT network
→ Transformation of perimeter security to a zero-trust principle
→ Secure integration mobile office / home office

Network management
→ Cloud-based platform, hosted in Germany
→ Automated and intelligent control of the IT network
