

Order Guide LANCOM OW-602

The LANCOM OW-602 has a standard Ethernet port, so an outdoor Ethernet cable that meets the requirements listed below can be used. A switch with PoE ports can also replace the optional PoE injector.

Depending on the desired installation, these accessory products may be purchased separately. This order guide provides an overview of the accessory items that can be used depending on the scenario.

Installation with own installation cable and PoE-capable Ethernet switch

#61664 LANCOM OW-602

Strain relief as short as possible or assemble without strain relief

Cable diameter
6.5 to 8.5 mm

Own outdoor cable

Caution: Your warranty claim for any damage will be voided if you use cables that do not meet the specifications!
