

PRESS RELEASE 2013-384

LANCOM GS-1108P for small-business and home-office networks

Silent powerhouse: New 8-port Gigabit PoE switch from LANCOM Systems

<u>Aachen, October 30, 2013</u>—*LANCOM Systems*, the leading German manufacturer of professional network solutions, introduces the *LANCOM GS-1108P*, the successor to the successful *ES-1108P*.

This unmanaged 8-port Gigabit Ethernet switch features Power over Ethernet as per IEEE 802.3af and 802.3at, making it ideal for power-hungry devices such as dual-radio access points or pivoting security cameras. It provides a cumulative power consumption on all ports up to 60 watts to ensure that network components are reliably networked and powered. Thanks to its size, its quiet fan, and its rugged, non-slip metal housing, it is ideal for use in small offices and businesses, or home offices. PoE also offers a highly convenient power source for IP phones and WLAN access points.

The quality and reliability of professional networks depends heavily on the switches they employ. With this new Gigabit switch, *LANCOM* offers customers and sales partners a component that is fully compatible to the LANCOM product

range in the familiar *LANCOM* quality. The status of the connections is clearly displayed on the front of the switch. The integrated power supply unit and the high degree of energy efficiency (inactive ports are switched off automatically) underscore the professional nature of this device.

An adapter for installation in 19" cabinets is supplied.

The LANCOM GS-1108P is available now.

LANCOM Systems background:

LANCOM Systems GmbH is the leading German manufacturer of reliable, innovative network solutions for business customers. LANCOM's two business units, VPN Network Connectivity and Wireless LAN, offer professional users secure, flexible infrastructure solutions for local-area and multi-site networks. The entire core product range is developed and manufactured in Germany. In addition, LANCOM also provides VPN solutions certified by the German Federal Office for Information Security (BSI) for the protection of particularly sensitive networks and critical infrastructures (EPCIP) against cyber attacks. LANCOM Systems has its headquarters in Würselen near Aachen, Germany, and other offices are located throughout Europe. Customers include small and medium-sized enterprises, government agencies, institutions, and major corporations from Germany, Europe and increasingly worldwide. The enterprise is a partner in the Alliance for Cyber Security initiated by the BSI.
